PPTACT1CS

The PROBE is an incandescent voltage test light with haptic feedback. the tool vibrates when detecting between 12v to 18volts. It also has two other functions, it can also be good for detecting grounds & continuity when this is detected a green light will show, if a bad ground is detected a blue light will indicate. Great for use on trailer circuits, road horn's, batteries, bulbs and fuses.

Main features:

Haptic Feed Back.

Vibrates between 12v to 18 Volts. Great when you cant see the light..

LED Indicators.

Blue: Bad Ground & Continuity
Green: Good Ground & Continuity.

Precision engineered probe.

Helps to maintain contact on slippery contacts. Maintains constant reading.

Computer Safe 3 Volts Output Max..

3mtr 6''Ft Long Coiled Cable.

Lets you work over Larger areas..
